

LIGHTWEIGHT, STRONG MODEL BOXES

John Worsley in England writes that he makes boxes for his models using the corrugated plastic material that signmakers are using these days. I haven't checked the price of this material, but I should think you'd be able to purchase individual sheets from any "fast" sign shop. John has drawn the diagrams below showing how he cuts and assembles the boxes, using strong plastic box tape. Sounds like it is worth a try.
